

Access control for any vacation rental.

Complete access control and streamlined guest experiences.

RemoteLock's EdgeState software provides complete access control from a single, easy-to-use dashboard. Whether you manage one property or hundreds, RemoteLock is designed to make managing access easy and efficient.

Better Guest Experiences

Provide guests temporary access which automatically expires at the end of their stay. Monitor and manage who has access when and where.

No Key Hand Offs or Lockboxes

Provide each guest access via email or text. No need to meet renters, deal with lost keys or rekey locks.

Centralized Control

Manage your properties, locks and user permissions from a computer or smartphone.

Notifications and History

Keep your finger on the pulse of your property's access with email and text notifications, as well as searchable history.

Scale As You Grow

EdgeState scales with your needs – from a single vacation home to large multifamily properties.

Controlled Access at Every Entry

Secure every door on your property, from the front door to garages and elevators.

Use Your Preferred Locks

RemoteLock's platform even works with connected locks from August, Yale, Schlage, Kwikset and more.

No Hubs or Equipment Needed

Use your existing Wi-Fi – no need for additional gateways or a secondary network throughout buildings.

Works with Vrbo, Airbnb and many more.

RemoteLock integrates with Vrbo, Airbnb and many other property management services making it easy for you to manage and automate access how you prefer.
